## STRAY ANIMAL PROJECT 2024 ANNUAL IMPACT REPORT

Stray Animal Project is a 501(c)(3) nonprofit organization that has received the highest rating possible from GuideStar, the leading nonprofit evaluator organization.

Our Tax ID is 84-4801908

*"As One We Rise Above"*

**Karina Canales**  
CEO Stray Animal Project

2024 marked a historic milestone for Stray Animal Project. Thanks to your generous support, we neutered & spayed a total of 7,584 dogs and cats, more than ever before!

We are making a long-lasting impact in different communities on the coast and in the highlands of Peru. However, there is still a lot more to do for the millions of stray animals suffering on the streets.

In 2025, our goal is to neuter/spay 10,000 animals! We want to expand to new regions where there is a lack of veterinary services and overpopulation of stray animals, and with your help, we can make it happen!

Thank you for loving the animals of Peru!

## 2024 IMPACT BY THE NUMBERS

**7,584**

Animals neutered/spayed

**118**

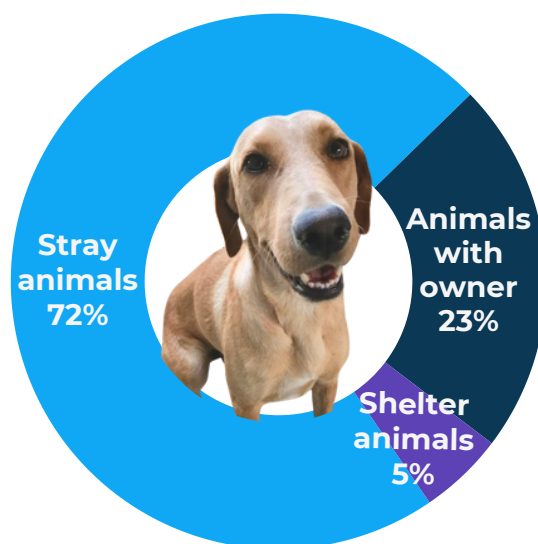

Neuter/spay campaigns

**1,716**

Pets fixed from low-income families

**28,498**  
**animals**  
**fixed to**  
**date!**

## LONG TERM IMPACT

**8.4**  
**Million**

dogs and cats prevented from being born and suffering on the streets in the next 7 years.

These calculations vary. We have considered the most conservative estimate from SNAP (Spay Neuter Assistance Program): "508 dogs and 4,948 cats can be born from one unsterilized female and her offspring in 7 years."

# WE ARRIVED AT MANCHAY !!

## Where is it located?

Manchay is a low-income community in the Pachacamac region of Lima, Peru. Due to poverty and lack of access to veterinary care, many dogs and cats suffer from abandonment, malnutrition, and disease in the streets.

## OUR IMPACT

In Manchay, most animals arrive at the vet clinic with flea and tick infestations due to the area's environmental conditions: unpaved roads and high levels of dust and dirt.

For this reason, we have added an additional blood test before each procedure.

As a result over a hundred dogs and cats that were not fit for surgery based on their blood results received veterinary treatment and were rescheduled for sterilization on future dates.

## OUR NUMBERS

123

Animals neutered/spayed

74

Dogs spayed

49

Cats spayed

One of the spayed dogs from the first campaign!

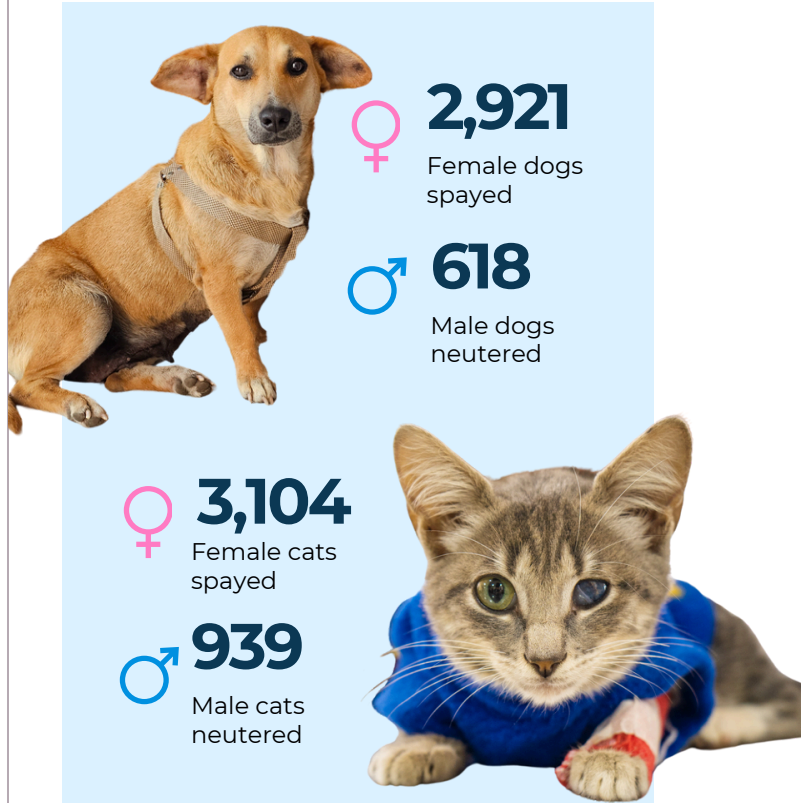

# MEET STRAY ANIMAL PROJECT'S 25,000TH FIXED ANIMAL

We spayed our 25,000th animal in May 2024! This cute girl is from Manchay

## OUR HEARTS BEAT FOR BOTH WOOFs AND MEOWs

## We keep growing!!

### EL AGUSTINO

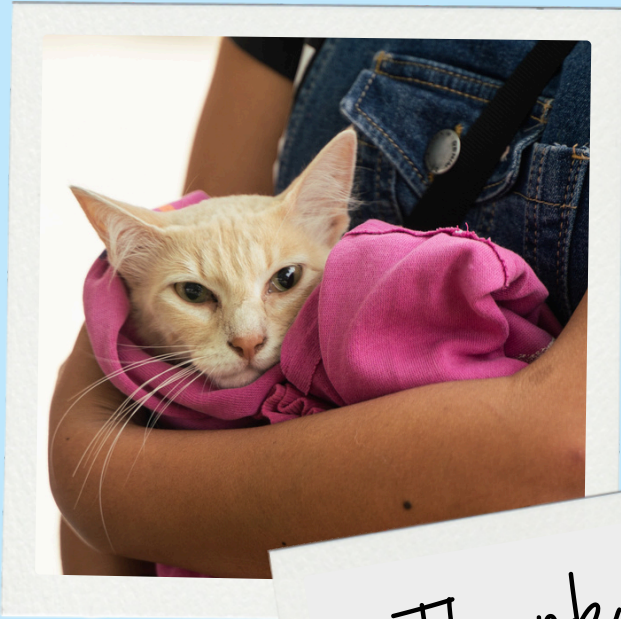

*District located in the west of Lima*

During the visit in El Agustino, we assessed the area and spoke with local residents.

We noticed a high number of stray animals and as a result, we decided to **increase our support in the zone from 100 to 150 surgeries per month for stray dogs and cats.**

Thank you  
for making this  
possible!
